SUMMARY

Software Development student with strong foundations in object-oriented programming, web development, and database-driven applications. Experienced in building front-end applications and gaining hands-on exposure to back-end and database concepts through academic projects using Python, Java, C#, JavaScript, React, PHP, ASP.NET, and MySQL. Known for great problem-solving skills, attention to details, and the ability to learn new technologies quickly. Strong work ethic developed through former client-facing roles with a proven track record of delivering accurate, high-quality work.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#

Web Development: HTML, CSS, JavaScript, PHP, WordPress, React, ASP.NET

Database Architecture: MySQL

Tools & Technologies: GitHub, Visual Studio, VS Code, IntelliJ IDEA

EDUCATION

Computer Systems Technology – Software Development (Advanced Diploma) Sept 2024 – Present
Mohawk College

- GPA: 90.53% - Dean's Honour Student

Bachelor of Arts (B.A.) in English Language Graduated 2015
Ho Chi Minh City University of Technology

WORK EXPERIENCE

Technical Illustrator, Construction Drawings July 2021 – Jan 2024
YDR Vietnam Co., Ltd. – A branch of Yuasa Design Room Co., Ltd.

- Produced and maintained highly detailed technical drawings for large-scale infrastructure projects, including Ho Chi Minh City Metro Line 1.
- Reviewed, revised, and validated drawings to ensure accuracy, consistency, and compliance with technical and industry standards.
- Collaborated with engineers and project teams to incorporate updates, resolve discrepancies, and maintain documentation quality.
- Demonstrated strong attention to detail, version control, and structured problem-solving across complex technical systems.

Assistant to the Director of English Department June 2019 – June 2021
The Asian International School

- Supported departmental operations by coordinating administrative tasks and facilitating clear communication with staff and students' families.
- Organized, maintained, and managed departmental records and documentation with a high level of accuracy and confidentiality.
- Assisted in planning and coordinating school events, schedules, and activities, ensuring smooth execution and adherence to timelines.

- Translated notarized and official documents across multiple domains with a high degree of accuracy and linguistic consistency.
- Applied strict attention to detail and confidentiality standards when handling sensitive and legally binding materials.
- Reviewed and revised translations to ensure clarity, correctness, and adherence to formal documentation requirements.

PROJECTS

Pet Café Website ([Youtube Demo](#))

- Developed a multi-page pet café website featuring introduction, events, menu, job postings, blog, and contact sections.
- Implemented an embedded map for location and a comment system for user interaction on blog posts.
- Designed and customized the website using WordPress.

Explore Saigon ([Git Repo](#) – [Website Demo](#))

- Developed an interactive web-based map application to explore locations in Ho Chi Minh City.
- Integrated Google Maps APIs to provide real-time interaction such as marker visualization, geolocation, geocoding, and route directions.
- Demonstrated front-end development skills, API integration, and dynamic UI behavior.

Master the Recipes ([Git Repo](#) – [Snack Expo Demo](#))

- Developed a React Native mobile application for browsing and searching meals using TheMealDB API.
- Implemented API integration and state-driven UI rendering for multiple user interaction flows.
- Optimized performance with conditional rendering and efficient state management.

Movies Collection ([Git Repo](#))

- Develop a full-stack web application built with ASP.NET Razor Pages to manage personal movie collections.
- Implemented authentication and role-based authorization for secure user access.
- Designed user-specific data handling to ensure data isolation across accounts.

Games Collection ([Git Repo](#) – [Youtube Demo](#))

- Developed a full-stack application for managing a video game collection using a RESTful API.
- Built backend with Express and SQLite supporting full CRUD operations.
- Created a React Native frontend to interact with the API and maintain real-time data synchronization.
